

## QUIZ 2:

1. Evaporation occurs when liquid water on Earth's surface turns into \_\_\_\_\_ in our atmosphere.
  - a. Solid ice
  - b. Water vapor
  - c. Liquid water
2. Water from plants and trees also enters the atmosphere. This is called \_\_\_\_\_.
3. Clouds are made of water droplets or ice crystals that are so small and light they are able to stay up in the air.
  - True
  - False
4. When a certain volume of air is holding all the water vapor it can hold, it is said to be \_\_\_\_\_.
5. The process of water changing from a gas to a liquid is called \_\_\_\_\_.
  - a. Evaporation
  - b. Condensation
  - c. Transpiration
  - d. Precipitation
6. Water Vapor Condenses to Form a Cloud.
  - True
  - False
7. When a cloud becomes full of liquid water, it falls from the sky as rain or snow – also known as \_\_\_\_\_.
  - a. Evaporation
  - b. Condensation

c. Precipitation

8. The circulation of water into water vapor by evaporation, water vapor to clouds by condensation and clouds to rain by precipitation is known as \_\_\_\_\_.
9. If water receives more heat, it evaporates \_\_\_\_\_.
  - a. Slower
  - b. Faster
10. All the clouds always cause rain.
  - o True
  - o False

ANSWERS:

1. B. water vapor
2. Transpiration
3. True
4. Saturated
5. B. Condensation
6. True
7. C. Precipitation
8. Water cycle
9. B. faster
10. False
