

Chapter 09

ALGEBRAIC EXPRESSION & IDENTITIES

Expression:

A combination of constants and variables by the four basic mathematical operations (+ , - , $\times$, $\div$) is called an “Expression”.

Examples:

1) $3x^2 + 3x - 4$

2) $4x^{1/3} + 5x + 2\sqrt{x}$

3) $4x^{-2} + 5x + 3$
