

Reproductive System:

- It produce off springs.
- Which entails the transmission of genetic materials from one generation to next generation, Ensuring survival of the species.

Human Reproduction:

- Humans are sexually reproducing and viviparous.
- Reproduction events in humans – **Formation of Gametogenesis.**

Male –Sperm

- Sperm formation continues even in old men.

Female –Ovum

- Ovum formation ceases in women around the age of 50 years.
- Human reproductive events occur after puberty.
- These are remarkable differences between the reproductive events in the male and female.
